

ENERGY HEALING COURSE

Explore & Empower

A course that follow the traditional and modern healing way

Become Energy Aware

WHAT IS ENERGY HEALING?

Our natural flow of energy always moves towards perfect health and well-being. However, when faced with difficulties in our life which we find too painful to accept, we tend to hold these unresolved negative energies in our Physical body, emotional body, mental body & our Auras (these are all linked to our Energy System).

This creates blockages in our energies which then depletes our vitality and can lead to ill health and suffering. With the assistance and the skills of the healer, these blockages are triggered and can be released through different technics.

This enables healing on all levels including physical health, emotional well-being, relationships with other and yourself, spiritual growth. The healer may also guide anyone through a process of inner peace and cleansing guidance for everyday life.

Where there is physical pain or disease, caused by stored negative energy, the up-lifting of the negative energy can remove the discomfort and boost the person in healing themselves from within.

Who is Energy healing for?

Energy Healing is for everyone who wants to take care of themselves, optimize healing and / or start to rise to a new vibrational level in their life.

WHY WE NEED ENERGY HEALING

The human body is a complete energy system in tune with the Universe. Any imbalance in the body creates an obstruction in the flow of energy, which results in illness.

1. Clearing energy centers

Chakras that are the seven main energy transmission centers of the body, the energy superhighways of the body energies.

Realigning & balancing these centers are the base of healing.

2. Free Blockages

We have created blocks during our life, society pressure, and family, trauma, then we're not in our own natural state. Energy healing helps neutralize these pollutions to bring you back into your place, and live your own life.

3. Raise Vibrations

Everything is made up of energy, we are vibrating.

"He have a good vibes..." it's really about the person's energy vibration. Even places have vibes. Enter a room in which a terrible fight has taken place, you can feel the dense energy, it goes the same for good energy, let's open you energy!

4. Unleash Human Consciousness

We have to evolve to a higher civilization and use our full abilities, this includes using all of our senses and raise our awareness. Energy healing is a part of our future.
